

# Norifin® PP N

Screen & pad printing ink for untreated polypropylene

Innovative Inks & Functional Lacquers

Norifin® PP N is a one-component screen & pad printing ink for untreated and pre-treated polypropylene.

### Applications:

- medical instruments (syringes and bags)
- office supplies, writing instruments
- advertising material
- candles

### Substrates:

- untreated PP
- pre-treated PP and PE
- coated substrates

Ink adhesion and resistance tests are always recommended, due to the vast variety of PP qualities.

### Properties:

- satin gloss
- high grade pigments, free of heavy metals, with excellent light fastness
- chemical & mechanical resistance

### Processing:

- easy processing in screen & pad printing process
- for open well or closed cup machines.
- Conventional pads and clichés can be used.
- excellent printability and reproduction of detail
- addition of **Hardener 002** can improve chemical and mechanical resistances
